Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Diagnoses:

Ulcerative colitis to 35cm

Recent flare

Medications:

Pentasa 2 grams twice a day

Salofalk 2 grams liquid enema started last week

I reviewed Mr [NAME] today. He has recently had a flare of his colitis with a flexible sigmoidoscopy

29 th September showing active disease up to 35cm. He was previously on suppositories and then

been changed to Salofalk liquid enemas. He is noticing a gradual improvement with these. He has

been given a supply for two months but I would be grateful if you could alter his repeat prescriptions so

he has these readily available. It is likely he will need to continue on them long term but when

settled down he could reduce the frequency to every other day.

As he is improving at present I have not made any changes to the plan but should the improvement

not continue or things deteriorate he knows to contact us via the IBD helpline.

Yours sincerely
