Dear Phil

MR [NAME] , 5 Hybiscus Lodge, Garden City, Dibden, Southampton Hampshire. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

I would be grateful if you or one of your colleagues could see this man who is on methotrexate for Crohn's disease. He was diagnosed at the Spire Hospital with bullous myringitis and this seems to have worsened since he has been on the methotrexate. I would be grateful if he could be reviewed. This is a rare condition and we would be grateful for any advice about possible interactions with immunosuppression. It is likely that he will need a TNF-alpha antagonist at some stage.

With best wishes

Yours sincerely
