Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Weight: 20kg.

Height: 108.3cm.

Current Medications:

Azathioprine 50 milligrams

Sulfasalazine 2.5 millilitres three times a day

Movicol one sachet as required

I reviewed [NAME] in clinic on the 17 th November along with her dad. [NAME] continues to feed and has episodes of vomiting. As you may recall [NAME] was recently treated with antibiotics for a urinary tract infection. [NAME] still complains of dysuria. Her faecal calprotectin recently is normal (which is less than 39). [NAME] has a normal consistency stool and the frequency is to twice a day. Her abdomen is soft and unremarkable.

[NAME] is as follows:

I have suggested to stop Azathioprine for two weeks at least and I will review on the 7 th December. To start empirical treatment with Co-amoxiclav 5 millilitres, three times a day for 10 days to see if although is negative. [NAME] likes to drink Pediasure. Due to weight issues we will continue with it now. [NAME] has suggested to increase Pediasure to four cartons a day.

I will request our Specialist Nurses to speak to school as [NAME] has missed out on a significant amount of attendance and the school will not accept our letters as evidence. I will request an ultrasound of the abdomen as well due to her symptoms.

Her C. diff toxin is positive in the stool however [NAME] does not have diarrhoea at the moment so we will not treat her for C. diff infection at the moment.

Thanking you.

Yours sincerely
