DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Diagnosis: Indeterminate left sided colitis

I reviewed this gentleman in clinic today. He is well. His weight has increased slightly. His good. He is opening his bowels once or twice a day and he is getting on with the Salofalk 3 g day and one enema of Salofalk alternative days. I reviewed his blood tests from last week and all fine.

We will see him again in six months' time. He could wean himself off of the enemas over the n so.

Yours sincerely
