Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Thank you for referring this lovely 41 year old lady to us today regarding her breast lump on side. As you may be aware she noticed this 4 to 5 weeks ago having fallen over at home and su smaller bruise on the right breast. On examining herself she noticed this lump for the first she does admit she is a not a regular examiner and may have had it for a longer period of tim whilst the bruise has improved the lump has stayed the same though it is not tender at presen Otherwise the skin has remained stable without any further bruising or redness and the size a the breast has remained stable. [NAME] has been no nipple change or discharge and in herself eating normally and has a stable weight.

Her past medical history includes depression for which she takes pregabalin and sertraline an she has a degree of obstructive sleep apnoea though she did not attend her formal sleep studi past she has had the contraceptive implant in her left arm for at least eight or nine years, more, and prior to that used the oral contraceptive pill. [NAME] is still getting periods and started when she was 14 years old and she has no children of her own. [NAME] is an ex-smoker smoked for a short of period until the age of 20 and 21 and as far as she is aware there is n history of breast cancer, nor for the matter any ovarian or uterine cancer or prostate or tes cancer.

On examination there was no axillary or supraclavicular lymphadenopathy and both breasts were pendulous and soft to palpate but in the right breast at the 1 o'clock position about 7cm fro there is a small subcentimeter firm mobile and quite deep lesion in keeping with her cysts. [confirmed on ultrasonography as a 6mm cyst and mammography was normal and only showed dense b glandular tissue. As such this is very reassuring and we can therefore discharge Mrs [NAME] f today. I have given her some advice leaflets regarding breast cysts and also how to examine o including some information about breast screening which she will be undertaking in a few year aforementioned I will therefore discharge her from clinic and I wish her all the best for the Thank you for your time.

Yours sincerely
