Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Diagnoses:

Ulcerative colitis

Subtotal colectomy with ileo-anal pouch and recent re-anastomosis

Short bowel syndrome

Bilateral DVTs and long-term warfarin

Partial hypoadrenalism

Epilepsy

Plan:

Outpatient appointment in six months' time with bloods and urinary sodium beforehand.

I reviewed Mrs [NAME] my colleagues from the Nutrition Support Team today. I am pleased to re-see she is very well and her pouchitis is controlled with metronidazole. Currently, she opens her pouch 4 times a day which is good for her and is not feeling thirsty or dehydrated. She continues on solution one litre a day and limits her other oral intake to a litre of fluid a day.

We will see her in six months' time with repeat bloods and urinary sodium beforehand.

With kind regards

Yours sincerely
