[ADDRESS]

Right superior retinoschisis with chronic detached retina

Right haemorrhagic vitreous detachment

Follow-up

In two months.

Comments

This gentleman was seen on October 2009 with chronic retinal detachment and retinoschisis and detachment. He was seen two weeks ago with an incident of vitreous haemorrhage in the right eye. Today his vision recorded at 6/9 in each eye and he developed clearing vitreous haemorrhage. Looks attached. Retinal detachment symptom explained fully to the patient. If he experiences needs to be referred urgently.

Yours sincerely

Mr [NAME] to
