Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Diagnoses:

Duodenal Crohn's disease leading to surgical resection 2015

Follow-up MRI imaging 2018 excluding any evidence of active Crohn's disease

Pulmonary sarcoid treated with low dose Prednisolone 5mg daily

Treated with Azathioprine and Allopurinol

Weight today 105.2kg.

Medications:

Azathioprine 25mgs once a day

Allopurinol 100mgs once a day.

I reviewed Mr [NAME] today. I was very pleased to hear that he remains completely asymptomatic and continues on Azathioprine and Allopurinol and his recent bloods on 22 nd February were complete. He eats well and has been putting on weight and is now trying to diet and lose some of it. Abdominal examination was completely unremarkable.

I have made no changes to his medication. He will continue to have three monthly blood tests and I will see him in eight months' time for review.

Thank you

Yours sincerely
