I was pleased to review Robert in the clinic along with his mum. He is doing really well. H

currently asymptomatic. He does a lot of sports, loves football and cricket.

On examination he looked completely well. Currently there are no mouth ulcers or mouth lesio

He had bloods done in the clinic today, including full blood count, ESR, CRP, ferritin levels

function tests and they are all normal. We plan to review Robert in six months' time in the

would be grateful if you could review Robert in your clinic in three months' time.

Yours sincerely
