Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Diagnosis: Pulmonary nodules

This patient [MED-ID] to the Lung Cancer Clinic and I was sorry to inform him that we are still uncertain of the origin of the pulmonary nodules.

Radiologically, these could be inflammatory (e.g. sarcoidosis) or neoplastic. As of the uncertainty, we will request a PET CT scan and an endobronchial ultrasound fine needle aspiration (EBUS) of station 7 mediastinal lymph node.

I have also requested β -HCG and LDH though clinically there is no testicular mass.

He will be seen in two weeks with the results of the above investigations.

Yours sincerely

Checked but not signed to avoid delay.

Anastasios Lekkas FRCP

Consultant Chest Physician
