Dear [PROVIDER-NAME] [NAME] , [ADDRESS]. [POSTCODE]

DOB: [DATE] , Hospital Number: [MED-ID] , NHS Number: [NHS-NO]

Diagnosis: Ulcerative proctitis diagnosed August 2014 (12 cm affected).

Current Medications: Pentasa suppositories on an as required basis.

I saw Mr [NAME] the IBD Clinic. I am glad that on the whole he has been well since we last saw him at the clinic. He is using Pentasa suppositories to control his symptoms. He finds that the optimal dose is that he takes this every second or third day and that keeps his symptoms under control. I have advised him to continue with this strategy. He does have the helpline and knows to contact us should his symptoms deteriorate. In the first instance I have advised him to take the Pentasa suppositories twice daily. If this does not settle a flare then he should contact the help line after a week or so. I have advised him to be seen in clinic in six months' time and at that point he would be happy to consider the virtual clinic for follow-up if things remain stable.

Yours sincerely
