Dear [PROVIDER-NAME] [NAME], [ADDRESS]. [POSTCODE]

DOB: [DATE], Hospital Number: [MED-ID], NHS Number: [NHS-NO]

Problem: Panenteric Crohn's disease with perianal and perineal involvement (diagnosed May 200

Current Management:

Modulen IBD as a complete feed - to start controlled food reintroduction

Pentasa 1 gram twice daily to be continued long-term

Sanatogen Gold for children one tablet daily to continue long-term

I was delighted to review Josie in clinic on 6 August.

She had an excellent response to her Modulen IBD and is now six-and-a-half weeks into treatment
significant improvement in her general health and good weight gain.

She looks well. She is now 40.3 kg. She has recently started her periods.

I am pleased with her progress. I have arranged dietetic input to commence food reintroduction. I would recommend she stays on some nutritional supplementation long-term. I have checked her and would like her to remain on Pentasa and vitamins as above. I have talked about the long-term relapse.

I will review her in three months, sooner if there are any concerns.

With kind regards

Yours sincerely
